#### DETAILED ACTION

### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21 & 35-36, drawn to an arrangement for selecting and evaluating an image, classified in class 385, subclass 286.
  - II. Claims 22-24, drawn to an image compression arrangement, classified in class 382, subclass 232.
  - III. Claims 25-34, drawn to an image pickup control system, classified in class 358, subclass 468.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the evaluation device may be implemented for evaluation of images

Application/Control Number: 09/443,293 Page 3

Art Unit: 2624

with parameters other than compression. The subcombination has separate utility such as compression of a single image.

- 4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as evaluation of images produced without the use of a device with an acceptability selection mode and a continuous shooting mode. See MPEP § 806.05(d).
- 5. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as compression of images produced without the use of a device with an acceptability selection mode and a continuous shooting mode. See MPEP § 806.05(d).
- 6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

Application/Control Number: 09/443,293 Page 4

Art Unit: 2624

examined even though the requirement be traversed (37 CFR 1.143).

#### Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 703-305-4390. The examiner can normally be reached on weekdays 7:00-4:30, alternate Fridays off.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center 2600 Customer Service center at 703-306-0377.

If attempts to contact the examiner and the Customer Service Center are unsuccessful, supervisor David Moore can be contacted at 703-308-7452.

Faxes pertaining to this application should be directed to the Tech Center 2600 official fax number, which is 703-872-9314.
